A community to be proud of

At Linden Homes, we're passionate about creating communities where everyone can find somewhere to call home. Our approach goes beyond simply building houses - we focus on building thriving, welcoming neighbourhoods that bring people together.

A key part of this vision is our mixed tenure model. Our communities offer a diverse mix of ownership options to ensure that everyone, has the opportunity to call somewhere home. Whether you're a first-time buyer, a growing family, someone looking to downsize, looking for a private rental home or seeking affordable housing, our developments provide a range of homes to suit different lifestyles and budgets.

We believe that great places to live are built on more than just bricks and mortar - they're built on a sense of belonging. That's why our mixed tenure developments are thoughtfully designed to welcome people from all walks of life. By offering a blend of private sale, shared ownership, and affordable homes, we create inclusive spaces where everyone feels at home and valued.

Our commitment to community goes further than the homes themselves. Every Linden Homes development is carefully planned with green spaces, play areas, and local amenities that encourage connection and support wellbeing. We design homes with quality craftsmanship, modern layouts, and sustainable features that make everyday living comfortable and future-proof.

At Linden Homes, we're not just building for today - we're creating places where people can grow, connect, and feel proud to call home. Our goal is to foster vibrant, resilient communities where everyone is proud to call it their home!

Timber Frame Homes - The future of home building

At Linden Homes, we strive to continually innovate in the way we build homes.

We know it should support the way you live, every single day. That's why we're embracing timber frame construction, a modern method that offers speed, sustainability, and superior comfort.

At Cherrywood Place, half of the homes will be built by timber frame. By building with precision-engineered timber, we create homes that are warmer and ready for you sooner, so your life can begin the moment you move in.

Timber frame homes are built faster, which means you could be moving into your dream home sooner than you think. And because timber is a natural insulator, your home stays warmer in winter and cooler in summer - helping you save on energy bills while staying comfortable all year round.

We use responsibly sourced timber from certified sustainable forests, so you can feel good knowing your home is kinder to the planet. In fact, timber stores carbon, making it one of the most environmentally friendly building materials available.

Every timber panel is precision-engineered in a factory-controlled environment, ensuring a consistently high-quality finish with fewer defects. That means less disruption, less waste, and more confidence that your home is built to last.
